

Partner Profile

The Foundation for the Promotion of Health and Biomedical Research in the Valencian Region, FISABIO, is a non-profit institution with scientific and healthcare character. The primary aim of FISABIO is to encourage and develop medical research in the Valencian Region. The purpose of FISABIO–Public Health is to carry out research to support the Public Health decision making. The Vaccines Research Department is an interdisciplinary research group within FISABIO-Public Health. The department carries out the clinical development of vaccines in collaboration with industry, and designs and implements observational studies and mathematical models for infectious diseases.
